By Ben Price

Stars and Stripes U.S. Bureau WASHINGTON, Aug. 11-The WASHINGTON, Aug. 11—The War Department announced to-day that no change in its fur-leugh rotation policy that would modify the general status of troops in the European theater was contemplated at present be-cause of one insurmountable ob-track incufficient shupping space

was contemplated at present be-cause of one insurmountable ob-stacle—insufficient shipping space for the necessary replacements. Under the present War Depart-ment policy only one-half of one per cent of entire troop comple-ments in the Pacific, Mediter-ranean and the Carribean thea-ters are eligible to return to the United States after serving at least two years in those theaters. These standards do not affect the Air Forces, which have their own system of rotation. Secretary of War Henry L. Stimson said last December, when the rotation plan was first an-nounced, that troops in the Euro-pean theater were not included under the furlough plan because (1) shipping was insufficient, (2) climate in the ETO was similar to that which soldiers were ac-customed to back in the United States and (3) few outfits had been in combat. **14 Reception Centers** However, veterans of the out-fits which took part in the Medi-

Yanks in France Nazis Periled **As Units Push** For Alencon

A new 50-mile advance from Le Mans yesterday brought Am-erican armored spearheads close to Chateau-Dun, 70 miles south-west of Paris, as other U.S. tank columns reached the outer Paris defenses in the Chartres zone, 50 miles from the French capital. Some American units swung north from Le Mans toward Alencon, 33 miles from Falaise, in an encircling thrust which menaced German forces holding back the Canadian First Army offensive and which threatened to close a trap on all enemy forces to the west. Paris Radio said the Americans were "beyond Alencon." German troops near Falaise
